

## NSW ORNITHOLOGICAL RECORDS APPRAISAL COMMITTEE

### REVIEW LIST

(Revised February 10, 2021)

The following list comprises birds that are considered rare in NSW based on reported observations over a preceding ten year period to a maximum average of 1.5 records per year. NSW ORAC encourages anyone sighting these species to take comprehensive notes, photographs where possible and to supply substantiation by other observers where appropriate. Details of the sighting should be forwarded to the Secretary of NSW ORAC at [rogrou@bigpond.net.au](mailto:rogrou@bigpond.net.au) by way of an Unusual Record Report (URR) Form which can be downloaded from the NSWORAC website at [www.nsworac.org](http://www.nsworac.org).

This list does not include any of those species on the Birdlife Australia Rarities Committee (BARC) Review List. In order to maintain consistency with the BARC Review List, the NSW ORAC Review List taxonomy is based on the IOC Checklist v10.2
